

# Eco-friendly<sup>1</sup> Products

Cooper is reading a web page about environmentally-friendly products. Let's read it together!

Eco-friendly Products You Can Buy... X

http://www.greenliving.com/eco-friendly-products/

We can help protect the environment by making small changes. In recent years, many eco-friendly products have been invented and introduced to the market.

### Metal<sup>2</sup> Straws

Plastic straws can be used once only but straws **made of** metal are **reusable<sup>3</sup>** and easy to clean. They are **durable<sup>4</sup>** enough to be used for years. These metal straws are usually **made of stainless steel<sup>5</sup>** or **titanium<sup>6</sup>**.

### Reusable Food Bags

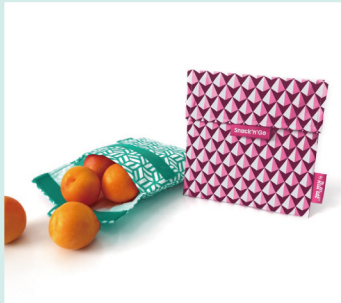

Photo source: rolleat.com

Plastic food packaging is thrown away after use because it cannot be washed. However, reusable food bags can be cleaned and reused! These handy bags, which are **made of** plastic and fabric, come in different shapes and sizes. They can even be **used for** holding noodles with soup!

## STEAM

Titanium is strong and lightweight. It is often used for making spacecraft. Therefore, it is also called the 'space-age metal'.

### Vocabulary

1. eco-friendly (adj.) 環保的
2. metal (n.) 金屬
3. reusable (adj.) 可再用的
4. durable (adj.) 耐用的
5. stainless steel (n.) 不銹鋼
6. titanium (n.) 鈦

### CLASSROOM EDUCATOR'S TIPS

We use 'made of' to talk about the materials of things and 'used for' to talk about the functions of things.

- e.g. The vase is **made of** glass.  
The kettle is **used for** boiling water.
