

## Read the leaflet.

**Large Animals**

In different parts of the world, there are many amazing large animals.

**Polar Bears**

Polar bears are the largest bears on Earth. Their fur is as white as snow. There are about 21 to 28 thousand polar bears in the world. They live mostly in the North Pole. They like to walk and look for food on ice.

5

**Elephants**

Elephants are bigger than polar bears. They live in the forests in Asia and Africa. Some of them live in zoos. People in the zoos train elephants to do tricks. You can see them play football, catch food and draw pictures with their noses.

10

**Crocodiles**

Crocodiles live in the rivers. You can see them in Asia, Africa, America and Australia. They have big and strong mouths. They eat fish and animals like birds and zebras.
