

## Fun Bits 4

# The Six Kingdoms

Do you know that there are six kingdoms of living things on earth? Let's look at three of them today!

### The Kingdom of Animals

This kingdom is very big. There are different classes of animals, for example, mammals, birds and fish. No animals in the world can live without drinking water, eating food or breathing air.

### The Kingdom of Plants

You can find different kinds of flowers, trees, and grasses in this kingdom. Plants can make their own food. Plants are important because they are the food for many animals.

**A** Draw lines to match the sentences to the correct words from the text.

1. \_\_\_\_\_ are a kind of fungi.

2. Humans belong to the \_\_\_\_\_ of animals.

3. Humans die \_\_\_\_\_ drinking water for a long time.

4. Many animals eat plants for food so plants are very \_\_\_\_\_.

5. Do not mix up plants with fungi. They are \_\_\_\_\_.

different

important

kingdom

without

Mushrooms

## The Kingdom of Fungi

The mushrooms that we eat come from the kingdom of fungi. Unlike plants, fungi cannot make food. A fungus has to get its food from others.

### STEAM Highlights

How many kingdoms of living things are there on earth? (Find the answer from the text and check it on P.72.)

**B Match the information to the pictures. Write the correct letters in the boxes.**

**A**

I am a kind of mammal. I die if I do not drink water, eat food or breathe air.

**B**

Some people may think we are plants. But we have to rely on others to live because we cannot make food on our own.

**C**

Flowers and grasses are my friends. I can make my own food. I am the food for some animals.

1.

2.
