

Read William's diary entry and the web page below.

6<sup>th</sup> June, 20XX (Monday) — 1.

 Cloudy

2.

Today I went to the Sir Smith Space Museum with my cousin Kenny and Aunt Janet. Kenny and I especially wanted to know more about some of the stars.

Once we arrived, we went to the 'Hall of the Universe' on the ground floor quickly. There were photos and videos of different planets and stars. Kenny and I were very excited but Aunt Janet just couldn't stop yawning.

3.

The exhibition was really eye-opening. We learnt a lot of fun facts about the universe. I think going to museums is a great way to gain new knowledge. I will do that more often from now on!

### Permanent Exhibition: Hall of the Universe

There are many sparkly stars and beautiful planets in the universe. Come to our exhibition to find out more about them. You can learn about the eight planets in the solar system, the brightest stars in the Galaxy, the nebulas and much more. Let's uncover the secrets of the universe!
