

**Steve is giving a presentation about modern technology.**

Good afternoon, everyone. Today I would like to share my thoughts on modern technology with you.

From radios to televisions, from beepers to mobile phones, from compact cameras to digital cameras, you can see that technology keeps improving. Thanks to modern technology, our lives become easier and more convenient.

For example, mobile phones used to be big, heavy and expensive. In the past, only rich businessmen used them to contact others at work. Nowadays, mobile phones are smaller and lighter, allowing users to use them for **entertainment** like playing online games and watching videos. People can even 'talk' to their phones using virtual assistants, or buy things using digital wallets. It is clear that technology greatly changes our lives.

I hope you can enjoy the benefits of modern technology. That's the end of my presentation. Thank you!

**Choose the best answers by blackening the circles.**
