

Bobby is writing a presentation script about the future of technology.

Good morning, everyone. Because of the rapid development of technology, some high-tech products may appear in the future to make our lives easier. I am going to talk about two of **them** today.

First, have you ever heard of self-driving cars? A self-driving car is able to sense the surrounding environment. With the precise GPS, it can go to the correct places without a driver. However, accidents caused by the self-driving system have happened before. Engineers are now working hard to improve the system. I believe there will soon be a fully self-driving car on the market.

Second, I think housemaids will soon give way to house robots. These robots will be able to help with a wide range of household chores, from making the bed to cooking meals. Nowadays, there are already different brands of robotic vacuum cleaners on the market. So, **we are not that far from the future**.

It seems the future of technology is exciting. Please share with me if you have any ideas of high-tech products. That's all I want to say. Thank you!

Choose the best answers by blackening the circles.

1. In the presentation script, the word '**them**' refers to _____.

- A. the development
 B. the technology
 C. our lives
 D. the high-tech products

3. Bobby thinks that '**we are not that far from the future**' because _____.

- A. people can now buy house robots
 B. house robots can make the bed
 C. people can now buy robotic vacuum cleaners
 D. technology is developing rapidly

skill 2. Bobby thinks house robots are going to replace _____.

- A. housemaids
 B. households
 C. vacuum cleaners
 D. other robots

Look for the keywords 'house robots' in the text.

Write 'T' (True) or 'F' (False) in each box.

4. (a) Self-driving cars do not need any drivers.
 (b) Self-driving cars are now safe to use.
 (c) Self-driving cars are now available for sale.
