

Read the film review and the letter below.

1.

Our Last Future (20XX)

Alice Ho

2.

The story is set in 2700 when most animal species are extinct. The Earth is full of rubbish and is no longer liveable. All humans have moved to Mars. Care-V, the main character, is a robot who is responsible for collecting rubbish on the Earth. His friends are either broken or out of battery. One day when he is watering a rare living plant in the landfill, a high-speed spaceship falls into a pile of rubbish in front of him. There is an injured sheep inside, together with some seeds. He is scared at first because he has never seen this animal before. But then he finds that the sheep is mild so he starts to take care of it.

3.

This is an educative film. I am impressed by the touching ending. The film stresses the importance of reducing waste. We should really care for our planet!

4.

Dear Editor,

I am writing to ask for your action to help raise awareness of the waste problem in Hong Kong.

I watched a thought-provoking film called *Our Last Future* last week. I was upset when I saw the Earth in the film become a planet of landfills. To be honest, if we don't want the scenes in the film to come true, we have to do something to ease the problem. We can begin with sorting and recycling rubbish.

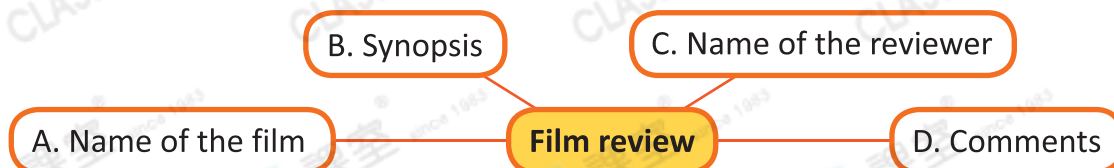

We ought to act at once before it is too late!

Yours faithfully,

Alice Ho

A. Text Type Features

Read the mind map below. Write the correct letters in the boxes.

Date: _____

: 10 mins

Words: 245

B. Comprehension

Choose the best answers by blackening the circles.

1. Which is **FALSE** about *Our Last Future*?

- A. Humans live on Mars in 2700.
- B. Care-V is a robot which works on the Earth.
- C. Sheep are extinct in 2700.
- D. Care-V's job is to make the Earth a cleaner place.

Q1

Eliminate the options that are true first.

skill 2. Which is Alice's opinion?

- A. *Our Last Future* is set in 2700.
- B. We have to do something immediately to help reduce waste.
- C. The waste problem in Hong Kong will become serious in 2700.
