## Sudoku for beginners

This Sudoku is comprised of numbers 1, 2, 3 and 4. How should I solve it?

1		3	
	2		1
4			3

1, 2, 3 and 4 only appear once in every row, column and block respectively.

## Sudoku Technique

- ▶ Look at the row, column or block that contain more numbers first.
- ▶ Try to write a number in a box. Then check the number to see if it has appeared in that row, column or block.

1	4	3	2
2	3	1	4
3	2	4	1
4	1	2	3

Look at the first column and the third row. We should write number 3 in this box.

Solve the following Sudoku with numbers 1, 2, 3 and 4.

1.

4		2	
	1	4	
3			4
1			2

2.

	2		
			4
	3	4	
2		1	

3.

		2	4
	3		
1		4	

4.

2			
			3
1	2		

Answer the following questions.

5. There is a simple Sudoku on the right.

B represents  $\star$   $\blacktriangle$  /  $\bullet$  /  $\blacksquare$ .

( $\star$  Circle the answer)

$\blacktriangle$		$\blacksquare$
B		$\bullet$

6. The Sudoku on the right is comprised of number 1, 2, 3 and 4. What do M and N represent respectively?

Answer: M = \_\_\_\_\_

N = \_\_\_\_\_

	3	M	4
	N		
2		3
