and answer

Matchstick Puzzle

Many games can be performed by moving matches, such as forming different shapes or fixing equations. Look at the following examples.

Shapes

Move 4 matches to make the lips of two cups up.

Solving tips

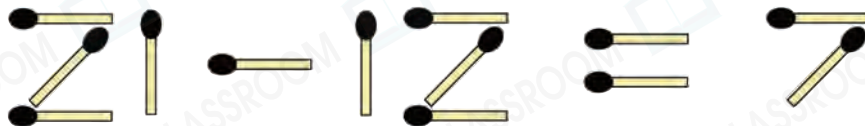

Distance between two cups is about the length of a match. Move 1 match and put it between two cups to make a cup with lip up. Then move 3 more matches to solve it.

Answer

Equations

Move 1 match to make the following equation correct.

Solving tips

$21 - 14 = 7$. The equation will be corrected if digit '2' in 12 becomes '4'.

Answer

Let's try the puzzle below!

Move 1 match to make the following equation correct.
