MODULE 4 Nature, Animals, Science and Environment

In this module, you will:

WATCH 

videos about the relationship between humans and nature.

READ 

about human activities and their effects on the environment.

MASTER 

the two targeted reading strategies:

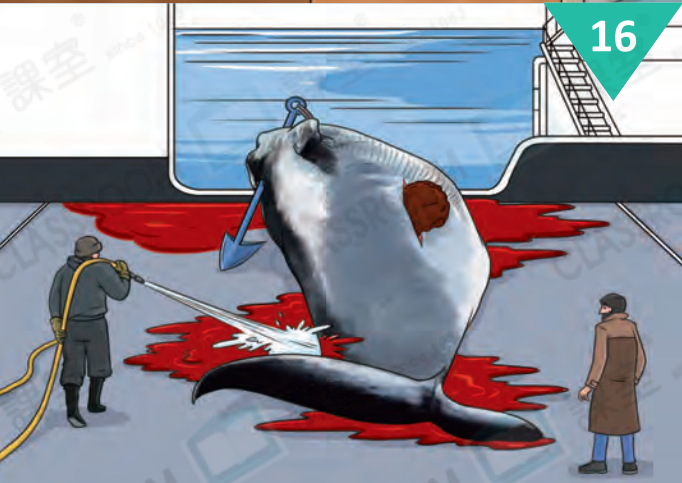

1. Identifying cohesive devices to understand the connections between ideas
2. Understanding literary devices

14

15

16

Pre-reading

A Look at the pictures. What do you see?

Put a cross (X) against the example(s) of exploitation of natural resources.

- developing smart farming and harvesting
- creating new dishes out of unsold food
- giving away surplus food to the needy
- poaching marine animals

B Think and discuss the questions.

1. How are humans and the environment connected?
2. What can we do to conserve nature and protect wild animals?
