

Writing Task Sample

Unit 13 Escape from the farm (p.109)

What should we do to protect the environment?

Write an article of about 150 words to explain the steps we should take.

Hints: Unit 13 centres around animals and the importance of protecting them and preserving their habitat. Please provide examples from your personal experiences in relation to animal conservation and habitat preservation. (e.g. Do not damage the Great Barrier Reef or abuse animals while snorkelling; Do not eat shark's fin or bear's paw)

With the rapid increase in the global population, human beings are threatening the survival of other animals. **Nevertheless**, the earth is not just our home but also the habitat of countless creatures. **Therefore**, we need to take steps to protect other animals **as well as** the environment.

To begin with, don't litter the ocean. Every year, many marine lives die from the accidental ingestion of plastic waste. Hence, when visiting the beach, remember to take any food packaging away and dispose of it properly. **Secondly**, when you go snorkelling, do not destroy the coral reefs. These reefs serve as habitats for many marine creatures. **Another important aspect of animal conservation is not to hunt or eat wild animals**. Follow the 'no sale, no harm' principle. As consumers, we can choose not to buy wildlife products, including food items, fur, and organs.

In addition, we can help to spread awareness and knowledge about animal protection. By educating others, we can inspire more people to safeguard the environment. Furthermore, if we have the time and opportunity, we can join animal protection organisations and participate in volunteer activities to make an impact.

Let's take action to create a better living environment and fostering a harmonious relationship between humans and other animals.
