

## Writing Task Sample

### Unit 2 Social media influencers (p.23)

Do you want to be an influencer in the future? Why?

Write an article to discuss and explain why in about 180 words.

Being an influencer requires various skills. I have been considering it as a **viable** job option, because I believe that my **skill set** lends itself to this type of work.

Firstly, I love new technologies. I love **gadgets** too, and I have a powerful laptop and a **decent** microphone at home. Furthermore, I love writing, so ideas for video scripts will come to me naturally. Equally, I love **fooling around** on camera, and I love creating **jingles and riffs** on the guitar. All of these **infatuations** of mine **would make for a** decent music **influencer**, I believe.

On the other hand, I would never do something **just for the sake of** money. I would rather do something that **adds value to society**. One of the influencers whom I follow online is a young guitar teacher who has helped many people get to the next level of playing. That, in my opinion, is a valuable **contribution** to society. And I don't mind that he makes a lot of money as a result, through **sponsorships** from *Fender* and *Gibson*.

In a nutshell, being a social media influencer is an exciting thing to do, if you have the **quirky** personality for it. I love the diversity in the **influencer space** too. Finally, I would not underestimate the hard work behind making videos.
